

Task 2 & 5 - Testing - Muhammad Khan

Test Number	Test Scenario	Test Case	Test Type	Test Data	Expected Result	Result	Comments	Amendment
1	Step 1	Store the userInput of the candidate name in "name"	Normal	"Laika"	name = "Laika"	Not As Expected	The variables were placed inside the while loop, furthermore more, the while loop only initiated when the initial conditions were not met - > leading to it never activating. Therefore, the while loop never activated.	I placed the initialising variables outside of the while loop
2		Store the userInput of the candidate name in "name"	Normal	"100"	print("Invalid name") and then restart the loop	Not As Expected	The print statement did work, however, the loop just ended, instead of restarting.	I changed the while to be while true, instead of the previous condition used.
3		Store the userInput of the candidate coursemark as an int in "coMark"	Normal	"38"	coMark = 38 as an int	As Expected	See Task 5 - Edited	
4		Store the userInput of the candidate prelim mark as an int in "preMark"	Normal	"38"	preMark = 38, as an int	Not As Expected	Mistakenly, I forgot to include "input()", instead I just written int(...)	I fixed this issue by taking a userInput and casting it as an int into preMark
5		Store the userInput of the candidate coursemark as an int in "coMark"	Boundary	"60"	coMark = 60, as an int	As Expected	See Task 5 - Edited	
6		Store the userInput of the candidate coursemark as an int in "coMark"	Boundary	"61"	print("That is an invalid mark"), and then restart the loop	As Expected	See Task 5 - Edited	
7		Store the userInput of the candidate prelim mark as an int in "preMark"	Boundary	"90"	preMark = 90, as an int	As Expected	See Task 5 - Edited	
8		Store the userInput of the candidate prelim mark as an int in "preMark"	Boundary	"91"	print("That is an invalid mark") and then restart the loop	As Expected	See Task 5 - Edited	
9		Store the userInput of the candidate coursemark as an int in "coMark"	Exceptional	"String"	error exception related to casting a string into an int	As Expected	See Task 5 - Edited	
10		Store the userInput of the candidate prelim mark as an int in "preMark"	Exceptional	"String"	error exception related to casting a string into an int	As Expected	See Task 5 - Edited	
11	Step 2	Calculate the percentage of the candidate using the coursework mark and prelim mark and store the result in "per"	Normal	coMark = 50 and preMark = 50	per = 66.67	As Expected	See Task 5 - Edited	

12	Step 3	If per >= 70	Normal	coMark = 60 and preMark = 53	per = 75 and grade = A	As Expected	See Task 5 - Edited
13		If per >= 70	Boundary	coMark = 55 and preMark = 49	per = 69 and grade = B	As Expected	See Task 5 - Edited
14		If per >= 70	Boundary	coMark = 60 and preMark = 45	per = 70 and grade = A	As Expected	See Task 5 - Edited
15		If per >= 70	Boundary	coMark = 58 and preMark = 49	per = 71 and grade = A	As Expected	See Task 5 - Edited
16		If per >=60	Normal	coMark = 50 and preMark = 48	per = 65 and grade = B	As Expected	See Task 5 - Edited
17		If per >=60	Boundary	coMark = 45 and preMark = 44	per = 59 and grade = C	As Expected	See Task 5 - Edited
18		If per >=60	Boundary	coMark = 50 and preMark = 40	per = 60 and grade = B	As Expected	See Task 5 - Edited
19		If per >=60	Boundary	coMark = 52 and preMark = 40	per = 61 and grade = B	As Expected	See Task 5 - Edited
20		If per >= 50	Normal	coMark = 45 and preMark = 38	per = 55 and grade = C	As Expected	See Task 5 - Edited
21		If per >= 50	Boundary	coMark = 40 and preMark = 34	per = 49 and grade = D	As Expected	See Task 5 - Edited
22		If per >= 50	Boundary	coMark = 35 and preMark = 40	per = 50 and grade = C	As Expected	See Task 5 - Edited
23		If per >= 50	Boundary	coMark = 37 and preMark = 40	per = 51 and grade = C	As Expected	See Task 5 - Edited
24		If per >= 45	Normal	coMark = 40 and preMark = 32	per = 48 and grade = D	As Expected	See Task 5 - Edited
25		If per >= 45	Boundary	coMark = 30 and preMark = 36	per = 44 and grade = No Grade Awarded	As Expected	See Task 5 - Edited
26		If per >= 45	Boundary	coMark = 33 and preMark = 35	per = 45 and grade = D	As Expected	See Task 5 - Edited
27		If per >= 45	Boundary	coMark = 29 and preMark = 40	per = 46 and grade = D	As Expected	See Task 5 - Edited
28		If per < 45, or else	Normal	coMark = 25 and preMark = 35	per = 40 and grade = No Grade Awarded	As Expected	See Task 5 - Edited

29	Step 4	print the name with the per variable and grade variable in one f string	Normal	name = "Laika" and coMark = 60 and preMark = 53	"Laika has achieved 75% overall, being awarded a grade of A"	As Expected	See Task 5 - Edited
